Professional Summary

Senior Software Engineer with 3+ years of experience specializing in Angular development, building scalable and high-performance web applications. Experienced in handling large datasets and developing workflow-driven enterprise systems with a strong focus on performance optimization, modular architecture, and reusable component design. Proficient in TypeScript, RxJS, and REST API integration, with hands-on experience delivering real-time features and optimizing production applications. Proven ability to lead cross-functional teams and deliver robust, user-centric solutions in Agile environments.

Technical Skills

Primary Skills

Frontend: Angular (v11–19), TypeScript, JavaScript, HTML, CSS, SCSS

Core Concepts: RxJS, Reactive Forms, Lazy Loading, Performance Optimization, Reusable Component Design, Micro Frontend Architecture, BEM Methodology, Atomic Design, Design Systems

UI & Visualization: Angular Material, Bootstrap, Tailwind CSS, D3.js, Storybook

API & Integration: REST APIs, WebSockets, GraphQL (Basic)

Tools & Platforms: Git, GitHub, Jenkins, CI/CD Pipelines, DevOps Practices, Jira, Swagger, Postman, Vercel, MySQL Workbench, Visual Studio Code

AI Tools: Copilot (GitHub), Cursor AI, Claude AI, ChatGPT

Development Methodologies: Agile, Waterfall

Secondary Skills

Frontend & Runtime: React.js, Next.js, Vite, Node.js, Three.js

Backend: Python (Django), Django REST Framework, FastAPI, PHP

Databases: MySQL, SQLite, CockroachDB, Apache Druid

Professional Experience

Senior Software Engineer

Sep 2025 – Present

Beinex Consultancy, Kochi

- Led a cross-functional team of 8 members (frontend, backend, QA) to deliver enterprise-scale Angular applications
- Architected scalable frontend systems using Angular (v16–19) and micro frontend architecture
- Improved application performance through optimized state management and change detection strategies
- Integrated REST APIs and handled asynchronous data using RxJS for real-time processing
- Contributed to CI/CD pipelines, improving deployment workflows and release efficiency
- Established structured code review practices ensuring high-quality and maintainable code
- Acted as Scrum Master managing sprint planning, estimation, and Agile execution

Software Engineer

Beinex Consultancy, Kochi

Sep 2023 – Sep 2025

- Developed scalable Angular applications handling large datasets and workflow-driven systems
- Built dynamic report builder with configurable tables and optimized rendering performance
- Implemented virtual scrolling and pagination for efficient high-volume data handling
- Developed real-time features using WebSockets for live updates
- Implemented internationalization (i18n) for multilingual applications
- Mentored junior developers and contributed to team productivity
- Awarded Beinex Excelencia Award for outstanding performance

Associate Software Engineer

Beinex Consultancy, Kochi

Sep 2022 – Sep 2023

- Developed interactive dashboards using Angular and D3.js for data visualization
- Built reusable UI components improving development efficiency
- Implemented complex reactive forms and validation logic
- Optimized performance using lazy loading techniques
- Improved UI responsiveness using modern CSS (Flexbox, Grid)

Full Stack Developer Intern

Beinex Consultancy, Kochi

Jun 2022 – Sep 2022

- Built web applications using Angular and Django
- Developed RESTful APIs for frontend-backend integration
- Recognized as Star Performer

Projects

Aurex – Governance, Risk, and Compliance (GRC) Platform

Aurex is a cloud-based enterprise platform for governance, risk, and compliance, offering real-time risk management, audit automation, and analytics. Contributed to building scalable Angular-based UI modules, dynamic report builders, and workflow-driven systems, improving performance and handling large-scale data processing.

InspektAI – AI-Powered Car Inspection Platform

Developed a web-based car inspection platform performing 300+ checks to identify hidden damages, estimate repair costs, and provide negotiation insights. Built using Next.js with geolocation integration and Razorpay for secure payment processing, enabling seamless booking and secure transactions.

Personal Portfolio Website

Developed a high-performance, interactive portfolio showcasing frontend expertise with modern UI and smooth animations. Built using React, TypeScript, and Vite, with advanced visuals using Three.js and GSAP, ensuring optimized performance and responsive design.

Achievements

- Beinex Excelencia Award (2024)
- Star Performer Award (Internship)

Education

Diploma in Computer Engineering

Government Polytechnic College, Perumbavoor

2018 – 2021

Certifications

- Programming with JavaScript – Meta
- Version Control – Meta
- Introduction to Front-End Development – Meta
- Modern JavaScript ES6 – Google
- React.js Essentials – LetsUpgrade
- Regular Expressions in Python – Coursera
- Get Started with Figma – Coursera
- AI For Everyone – DeepLearning.AI
- AWS Fundamentals – AWS
- Programming for Everybody (Python) – University of Michigan
- **Anthropic AI Certifications:** Claude 101, Claude Code 101, Claude Code in Action, Introduction to Claude Cowork, Building with the Claude API, Claude with Amazon Bedrock, Claude with Google Cloud Vertex AI, Introduction to Model Context Protocol, Model Context Protocol Advanced Topics, AI Fluency Framework & Foundations, AI Capabilities and Limitations, AI Fluency for Educators, AI Fluency for Students, Teaching AI Fluency, AI Fluency for Nonprofits, Introduction to Agent Skills, Introduction to Subagents
